# 4 wheel concept

Size against ukmarsbot

4 wheel concept

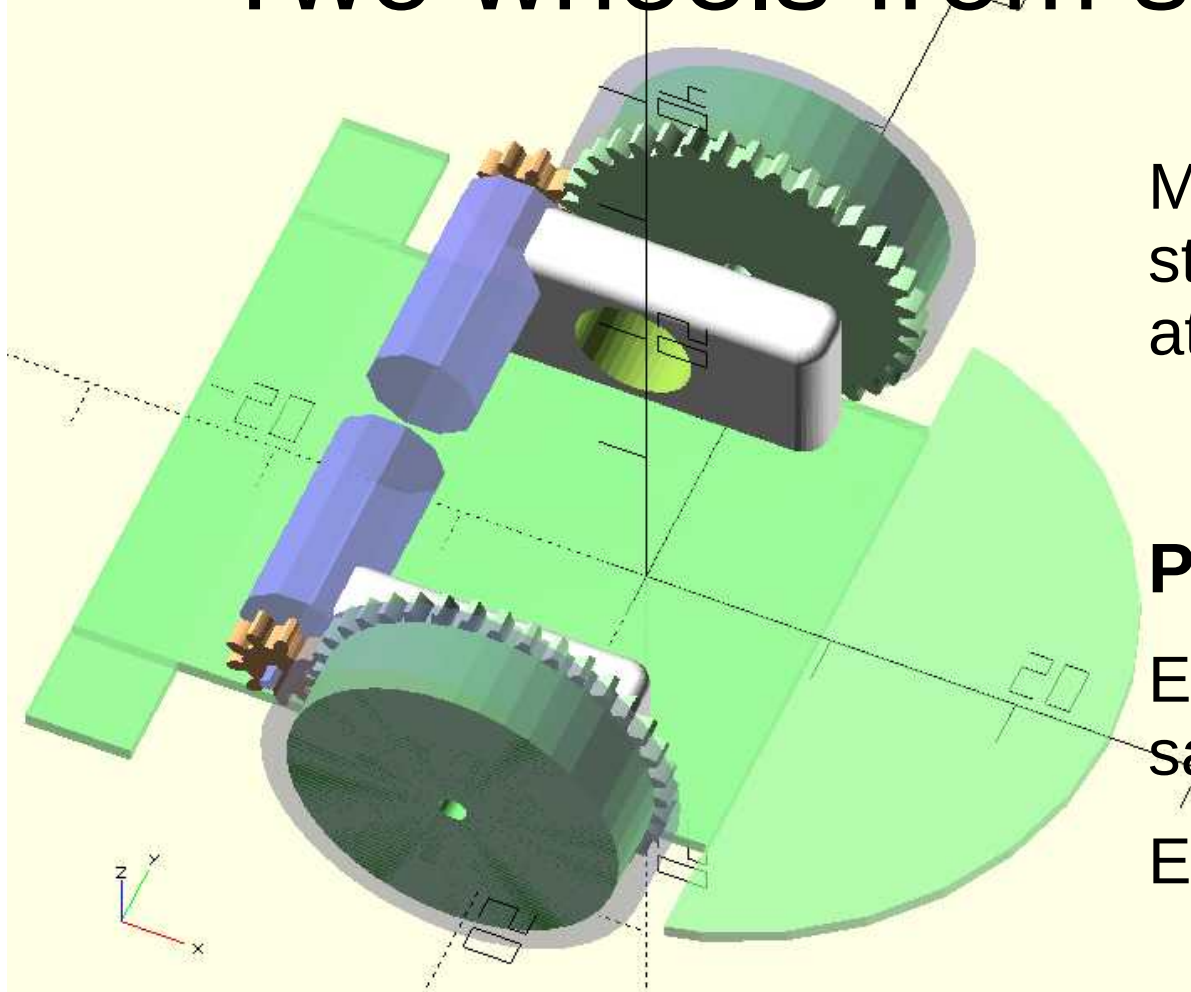

Potential Problems

Wheels need to be 0.3 module – basically custom gears/wheels (supply) … and tyre availability.

Wheels

Holes in rear face?

Two wheels from same PCB?

Maybe wheels could be standard 0.5 mod gear attached to wheel?
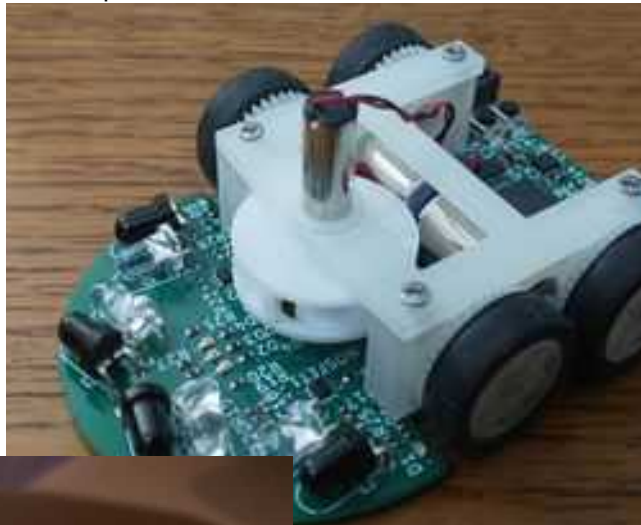

Potential Problems

Encoder position not the same

Extra motor keep outs PCB

tennisyi mouse

RTCorp

Early BeeClone?

Matsui's Sapphire

Matsui's Zirconia (open design)
